Full Stack Developer / Foxhole QA, Austin, Texas, United States

- Created and managed the Foxhole QA website with an admin dashboard for updates on blogs, featured works, and testimonials.
- Provided ongoing maintenance and support for website functionality
- Specialized in Mobile Development and Data Analytics tasks, Ensuring diverse client needs were met effectively

Mobile Developer / Web Developer / Freelance

JANUARY 2025 – MARCH 2025

- **Student Enrollment System (Web Application)**
 - Developed the backend for the student enrollment system, managing user authentication, student registration, and course assignments.
 - Designed a relational database structure for secure and efficient data management.
 - Created RESTful APIs for seamless integration with the front-end application.
 - Implemented role-based access control for students, teachers, and admins.
- **Tools** - PHP (Laravel), MySQL, REST API

MARCH 2024 – FEBRUARY 2025

- **Lending Management System (Windows Desktop Application)**
 - Developed a standalone lending management system for windows desktop.

- Implemented loan tracking, payment scheduling, and interest calculation features
- designed a user-friendly interface for efficient customer and loan data management.
- Integrated MySQL for secure data storage and retrieval.
- **Tools** - C#, .Net Framework, MySQL

APRIL 2021 – JUNE 2022

- **Educational Multiplayer Math Game (Prototype Developed)**
 - Created a prototype for a multiplayer math-learning mobile game.
 - Developed the backend server using Node.js and Socket.IO for real-time interactions.
 - Built and tested core gameplay features before project discontinuation.
 - **Technologies:** Java, Node.js, Socket.IO, Visual Studio

APRIL 2021 – JULY 2021

- **Laundry Shop Web & Mobile Application**
 - Developed a full-stack web and mobile application for a laundry shop.
 - Implemented features like customer management and payment integration.
 - Designed a responsive and intuitive user interface for both web and mobile platforms.

APRIL 2018 – JULY 2018

On the Job Training / Tokyo System Solutions, Unit 205, Citrine Building, Magsaysay Ave, Naga City

- Create a Human Resource and Web Application that can be used for other companies.
- Learning an Angular Framework for the Web Application.

Technical Skills

- **Frontend Development:** HTML5, CSS, JavaScript (ES6+), TypeScript, React.js, Angular
- **Backend Development:** Node.js, Express.js, REST APIs
- **Databases:** PostgreSQL, MySQL, SQL
- **DevOps & Cloud:** Docker, AWS
- **Version Control & Tools:** Git, GitHub, npm
- **Architecture & Development:** MVC, API Development, Authentication & Authorization

Soft Skills

- Strong communication and collaboration
- Problem-solving and analytical thinking
- Documentation and reporting
- Adaptability and quick learning

Education

JUNE 2015 – SEPTEMBER 2020

Bachelor of Science: Information Technology

University of Nueva Caceres – J. Hernandez Ave, Naga, Camarines Sur

Projects

Warehouse Inventory System

- Developed a **web-based warehouse inventory management system to monitor and maintain accurate inventory counts and item records.**
- Implemented real-time inventory monitoring to track stock levels and identify items with critically low quantities.

- Developed both client-side and server-side components to support inventory management and data processing.
- Integrated the system directly with the company's SQL Server database using SQL Server management Studio (SSMS) for secure and centralized data management.
- Designed and implemented a user-friendly interface using [React.js](#) for efficient inventory tracking and management.
- Created functionality for monitoring stock availability and providing alerts or indicators when inventory reached critical levels.
 - Tools - [React.js](#), SQL Server Management Studio (SSMS), SQL Server, Client-Side & Server-Side Development

Tour & Travel Management System

- Developed a **Tour & Travel Management System** using **Laravel, MySQL, Web, and Mobile** Applications.
- Built a client-facing website for **browsing and booking pre-made tour packages** with detailed itineraries.
- Developed an **itinerary and tour management system** for creating and managing tour packages, schedules, and activities.
- Built a mobile application for **tour company administrators** to receive notifications and manage pending requests.
- Implemented **booking and payment approval workflows**, allowing authorized staff to approve or reject requests.
- Developed administrative features for managing **tours, itineraries, bookings, payments, users, and notifications**.

Desktop POS System - Pizza Restaurant

- Developed a desktop-based Point-of-Sales (POS) system inspired by a pizza restaurant environment as a personal college project.
- Designed the system independently for learning and experimentation with features for managing orders, products, inventory, and sales transactions.
- Implemented the application using C# / Visual Studio with Microsoft SQL Server (SSMS) for database management.
- Created database-driven functionality to store and retrieve product, inventory, and transaction records.
- This project was independently developed for educational and portfolio purposes and was not affiliated with or an exact replica of Shakey's Pizza
