PROFILE

Detail-oriented and self-motivated Web Developer with a Bachelor's degree in Information Technology. Experienced in technical support, infrastructure management, and full-stack development. Proficient in Next.js, TypeScript, React, Laravel, Vue.js, JavaScript and Node.js. A quality-driven professional with a strong work ethic and a passion for building efficient, user-friendly applications. Recently built and deployed an AI-powered full-stack application (Next.js + OpenAI), expanding into LLM API integration and AI workflow design.

EXPERIENCE

IT System & Data Analyst — Milaor Trading Corporation

June 2025 – August 2026 | Full-time | Brgy. San Jose, Milaor, Camarines Sur — Nestlé Warehouse

- Supervised warehouse encoders, ensuring accurate and timely encoding of sales and inventory data.
- Prepared sales reports, monitored inventory, and organized operational data with Microsoft Excel.
- Used SQL to retrieve, manage, and analyze sales and inventory data.
- Performed data analysis to monitor sales performance, stock levels, and product movement.
- Monitored inventory records and identified stock discrepancies and data inconsistencies.
- Prepared sales, inventory, and operational reports to support management decision-making.

Full Stack Developer — Foxhole QA

May 2022 – March 2024 | Remote | Austin, Texas, United States

PHP · Laravel · Vue.js · MySQL · Node.js · Swift (iOS) · Android · Firebase · VS Code

- Created and managed the Foxhole QA website with an admin dashboard for blogs, featured works, and testimonials.
- Developed full-stack web applications and mobile applications for both iOS and Android.
- Specialized in Mobile Development and Data Analytics tasks for diverse client needs.
- Performed manual QA testing to identify and report bugs, ensuring reliable releases.
- Provided ongoing maintenance and support for website functionality.

Mobile Developer / Web Developer — Freelance

Ongoing | Freelance | Remote

- Delivered mobile and web projects for various clients, from concept through deployment.
- Handled full-stack development, maintenance, and support across different technologies.

On the Job Training — Tokyo System Solutions

April 2018 – July 2018 | Internship | Unit 205, Citrine Building, Magsaysay Ave, Naga City

- Created a Human Resource and Web Application that can be used for other companies.
- Learned the Angular framework for the web application.

TECHNICAL SKILLS

Frontend: HTML5, CSS, JavaScript (ES6+), TypeScript, React.js, Vue.js, Angular, Next.js, Tailwind CSS

Backend: Node.js, Express.js, Laravel, REST APIs

Mobile: Swift (iOS), Xcode, Android, Firebase

Databases: PostgreSQL, MySQL, SQL, SQL Server, Prisma

DevOps & Cloud: Docker, AWS, Vercel

Architecture: MVC, API Development, Authentication & Authorization, Zod (Validation)

Testing & Quality: Vitest, Playwright, ESLint, Prettier, Manual QA Testing

Tools: Git, GitHub, npm, VS Code, Microsoft Excel

Soft Skills: Communication & collaboration, Problem-solving, Documentation & reporting, Adaptability

AI INTEGRATION — BUILDING & SHIPPING

Building and deploying AI-integrated full-stack applications:

LLM API Integration (OpenAI) — Shipped in a real app | AI Workflows (human-in-the-loop approval) — Built in production | Prompt Engineering — Practicing | Python (fundamentals) — Learning

PROJECTS

AI Developer Task Manager

AI-powered task and project management platform for developers: Next.js + TypeScript on PostgreSQL (Neon) with Prisma, Auth.js and Zod validation; AI task breakdown, implementation plans, acceptance criteria and technical review behind an approve/reject workflow; Kanban, sprints, task dependencies and a developer dashboard. Live: ai-developer-task-manager.vercel.app

Next.js · TypeScript · PostgreSQL · Prisma · OpenAI

Dev Hub

Local-first developer hub that shows, runs and guides every project in one place — auto-detects apps from package.json, artisan or docker-compose.yml, generates stack, blueprint and setup-guide views, with run/stop controls via a local Express server.

Node.js · Express · React · Full-Stack

Warehouse Inventory System

Web-based inventory management with real-time stock monitoring, low-stock alerts, and centralized data via SQL Server (SSMS); React.js interface for efficient tracking.

React.js · SQL Server · SSMS · Full-Stack

Tour & Travel Management System

Client-facing booking website, itinerary and tour management, mobile admin app with notifications, and booking/payment approval workflows.

Laravel · MySQL · Web · Mobile

Student Enrollment System

Backend for student enrollment: authentication, registration, course assignments, relational database, RESTful APIs, and role-based access control.

PHP (Laravel) · MySQL · REST API

Lending Management System

Standalone Windows desktop app with loan tracking, payment scheduling, interest calculation, and MySQL data storage.

C# · .NET Framework · MySQL

Desktop POS System — Pizza Restaurant

Desktop point-of-sales for orders, products, inventory, and sales transactions; independent college project.

C# · Visual Studio · SQL Server · SSMS

Educational Multiplayer Math Game

Prototype multiplayer math-learning mobile game with real-time Node.js / Socket.IO backend.

Java · Node.js · Socket.IO

Laundry Shop Web & Mobile Application

Full-stack web and mobile app with customer management, payment integration, and responsive UI.

Full-Stack · Web · Mobile

EDUCATION

Bachelor of Science in Information Technology

University of Nueva Caceres — J. Hernandez Ave, Naga, Camarines Sur | June 2015 – September 2020

LANGUAGES

English, Filipino
